

STRENGTH AND DURABILITY IN A LIGHTER ALTERNATIVE.

AG

SERIES

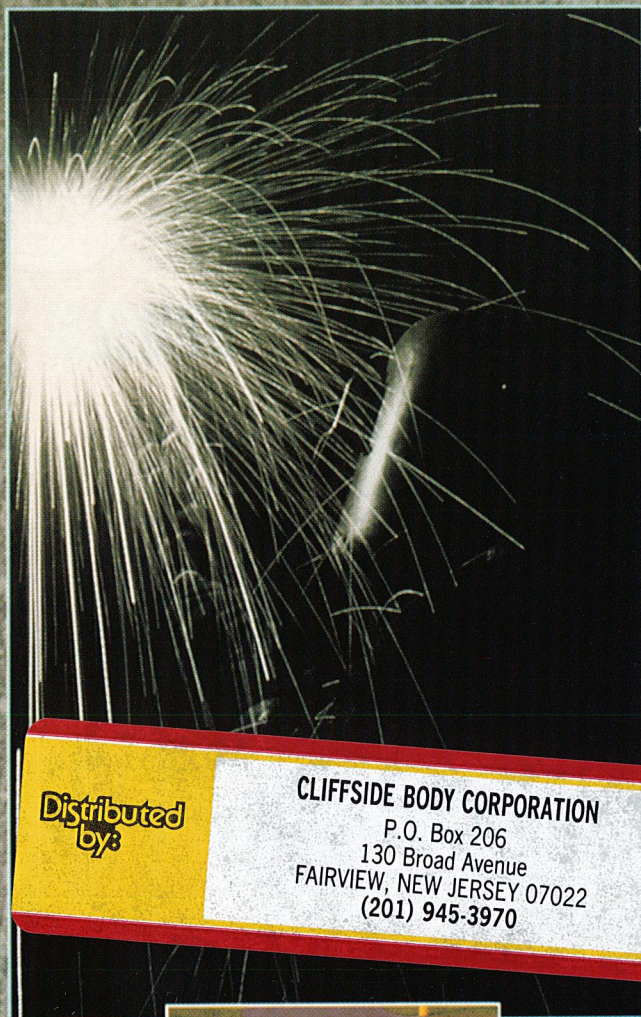

Leave it to the people at R/S to deliver one of the industry's most popular aluminum construction bodies. The AG Series provides the asphalt pavers or material hauler, a lighter aluminum alternative. Standard features include extensive use of extrusions at all critical points tying the understructure, floors, walls and posts together resulting in unsurpassed structural integrity. As your custom built R/S Aluminum Body serves you year after year, you'll come to appreciate why R/S builds features, as standards, that other may not.
